Production / Operations Manager

Description

Our client is a market leader & established brand in the soft furnishing industry and is still owned and run by the same family that started the company 60 years ago. The commitment of the family is very much reflected in the friendly service and high levels of personal commitment exhibited by all staff and today, as a fourth generation family business, they take great pride in where they come from. Their story and future growth all stem from passion, not only for their products and customers, but for the industry as a whole and they are committed to upholding the standards & values you would expect from a British family business today and always. This drives the high standards they hold in every aspect of the business from production to customer service and aftercare and, due to continued growth, they are now looking to appoint a Production / Operations Manager to join their busy production department.
