Project Engineer

Description

Our client, Rotational Moulding Group is a well-established and growing plastic manufacturing business, operating across three sites in the North-West since 1973. With a strong reputation for quality and innovation, the group delivers a diverse range of manufacturing solutions including rotational moulding, vacuum forming, CNC machining, robotics and fabrication. Supported by an enthusiastic and expanding team, the business offers a dynamic environment where individuals can contribute ideas, develop their skills and be part of a collaborative and forward-thinking culture. They are now seeking a Project Engineer to support projects across their full lifecycle.

Skills

Ideal skills and qualities for this Project Engineer role are:

- **Highly organised**
- **Excellent time management**
- **Excellent communicator**
- **Process driven**
- **Pro-active**
- **Problem solver**
- **Eager to learn**
- **High attention to detail**
