

AutoCAD Technician

Location: Trafford Park

Salary: c£28k+ bonus (negotiable - depending on experience)

Job Type: Permanent

ArcelorMittal

Would You Like to Draw a Career in Steel?

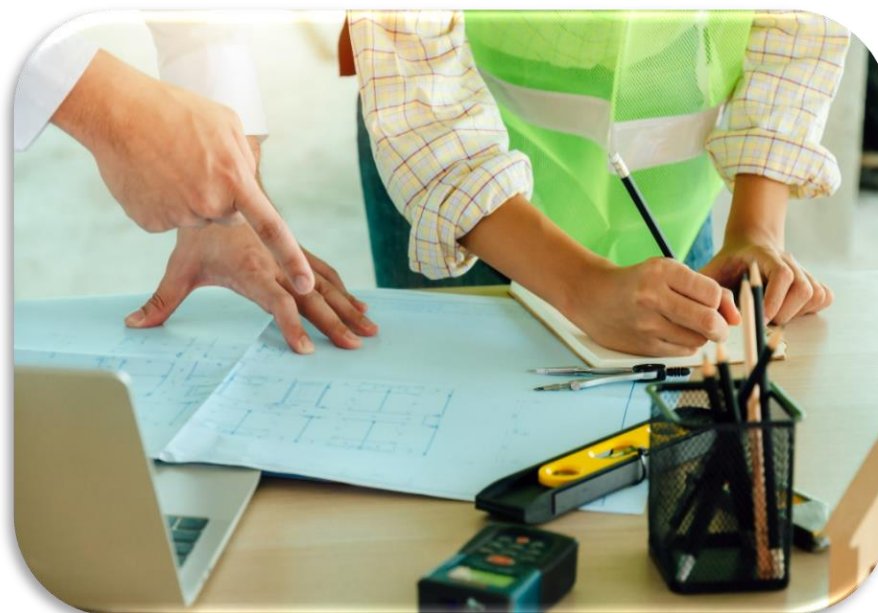

Our client, Arch Steel (part of ArcelorMittal Building Solutions) is a leading UK manufacturer of high-quality steel roofing, cladding, façade systems and bespoke fabrications for the construction industry. They deliver innovative and reliable products and services across the sector, supported by a commitment to sustainability, quality and outstanding customer service. At their core, they believe that attention to detail is the cornerstone of every project and are driven by a passion for precision, ensuring that every aspect of their craftsmanship is executed flawlessly. As such, they are now seeking a skilled AutoCAD Technician to join their Drawing Office team.

You will play a key role in preparing accurate technical drawings and supporting the production of bespoke steel building components for a wide range of commercial projects. You will communicate effectively with internal teams (and occasionally with clients as and when required) and work closely with the design and production teams to interpret project requirements and your key responsibilities will include producing and updating 2D AutoCAD drawings to a high standard, assist with technical documentation and design revisions and to support other drafting tasks as required to help deliver projects on time and to specification.

To be shortlisted for this role you will need proven experience and be fully conversant with AutoCAD 2D along with a good working knowledge of Word and Excel. Experience with AutoCAD Inventor or SolidWorks is advantageous but not essential and a background in the sheet metal industry would also be beneficial as would experience with Lantek or Radan Punch/Laser programming however these are not essential as full training will be provided. Strong communication skills are a must with the ability to liaise professionally with clients and colleagues. This is a fantastic opportunity to be part of a dynamic team that values quality, innovation and collaboration. You'll work on projects that make a real impact across the UK's built environment, with opportunities to grow your technical skills and career.

Ideal skills and qualities for this role are:

- **High Attention to Detail**
- **Highly Organised**
- **Excellent Communicator**
- **Team Player**
- **Flexible / Adaptable**
- **Pro-Active**
- **Good Under Pressure**
- **Self Starter**

If you would like to apply for this role, please send us your fully detailed application, quoting job ref. **UPR290** to Untapped Potential by email to applications@untappedpotentialltd.co.uk.

We have a selection day planned for 4th Sep 2026 so please keep this date clear.
